AMERICAN MADE**

A wide-angle photograph of a large, modern industrial building with a long, low profile and a flat roof. The building is light-colored with several windows. In the foreground, there is a calm pond reflecting the sky and the building. To the right of the pond, three flagpoles stand on a small island of land. The top pole has the United States flag, the middle pole has a dark flag with a light emblem, and the bottom pole has a blue flag with a white emblem. The sky is a clear, pale blue. The overall scene is peaceful and well-maintained.

AMERICAN MADE. FAMILY OWNED. AND PROUD OF IT.

CAMBRIA® IS THE ONLY FAMILY-OWNED, AMERICAN-MADE PRODUCER OF NATURAL QUARTZ SURFACES. THIS IS JUST ONE OF THE MANY REASONS WHY CAMBRIA CONTINUES TO BE THE LEADER IN DESIGN AND INNOVATION. IT'S A HIGHER COMMITMENT TO EXCELLENCE THAT STEMS FROM A RICH HERITAGE ROOTED IN OUR SMALL TOWN IN SOUTHERN MINNESOTA.

EXTRAORDINARY QUALITY IS BUSINESS AS USUAL

why CAMBRIA?

QUARTZ - THE NATURAL CHOICE

- Quartz is one of the most common minerals on Earth.
- Only the clearest white crystals are used to add dimension and make a difference you can clearly see.

SUPERIOR PERFORMANCE

- Quartz is rated 7 on the Mohs scale of hardness (diamond is a 10) making it the most scratch-resistant and durable surface available.
- Cambria® is 93% pure quartz. Granite contains approximately 40-60% quartz, along with more porous, weaker minerals, making it more susceptible to damage.
- Has flexural strength of 6,800 PSI which makes it twice as strong as granite and more than three times stronger than marble.

EASY-CARE CONVENIENCE

- Never needs sealing, polishing, or reconditioning.
- Cleans up with just warm water.

NONPOROUS/NSF RATED

- Staining liquids and harmful bacteria are never absorbed.
- Certified by NSF International as safe for use as a food preparation surface.

ENVIRONMENTALLY FRIENDLY

- Certified GREENGUARD Gold as a low-emitting product for indoor air quality and is suitable for any environment.
- Dedicated to responsible mining, and committed to recycling 100% of the water used during processing, circulating 1,700 gallons per minute.
- Recycled water from on-site storm ponds is used to irrigate production facility grounds.

AMERICAN CRAFTSMANSHIP

- Handcrafted from start to finish in Minnesota to ensure the highest quality all the way to customers' homes.
- State-of-the-art technology used in production ensures flawless design without compromise.
- Industry-leading innovation enables groundbreaking new designs unlike anything else in the world.

EXPERIENCE AND SUPPORT

- Cambria provides education for fabricators and installers at Cambria® University.™
- Retail and product display tools available.
- Full-service marketing, including social media and advertising.
- Local sales support and trade events provided.
